

PRODUCT LIST

Sr. No.	Product Name	Description
PRE-TREATMENT		
Bio Polishing Enzymes		
1	Denicell DWN	Genetically modified Neutral Cellulose for Bio Polishing of Garments, Cotton etc.
2	Denicell DWA	Genetically modified Acid Cellulose for Bio Polishing of Garments, Cotton etc. for Color Cutting / Fading.
Desizing Enzymes		
3	Starcozym HT Liq.	Desizing Enzyme based on Alpha Amylase for Cotton at High Temperature with range from 80 – 110.
4	Starcozym CT Liq.	Desizing Enzyme based on Alpha Amylase for Cotton at Cold Temperature with range from 35 – 80.
Chelating Agent / Sequestering Agent		
5	Ecoquest CL 100	Efficient Sequestering Agent for Textile as well as Non Textile Processing Agents for removing hardness of water
6	Starcochel SAZ Conc.	Concentrated Sequestering Agent for removing the hardness of water to prevent uneven dyeing problems in cotton fabrics
Wetting Agent		
7	Ultrawet C	Ready to Use Wetting and Rewetting Agent for cotton
8	Ecowet OT Paste	Concentrated Wetting and Rewetting Agent for cotton and its blends

OT Wetting Agent

Sr. No.	Product Name	Description
9	Ecowet OT Conc.	Concentrated Wetting and Rewetting Agent for cotton and its blends
10	Starcowet LFW	GOTS approved Concentrated Low Foaming Wetting agent that is APEO / NPEO free based on Emulsifiers

Scouring / Wetting Agent

11	Scourplus GFL	Powerful Scouring & Wetting agent for cotton that is stable in high temperature and alkaline conditions
12	Starcoscour LFS	Powerful Low Foaming Wetting Cum Scouring Agent for Cotton & Its blends that also decreases Caustic dosage and hence Load on ETP.
13	Reactowet DTC	Excellent Wetting agent to increase the absorbency & penetration of the fabric

Stain Removing Agent

14	Starcoclean EXI	GOTS approved Non Ionic Stain removing agent for cotton and its blends
15	Starvin FCC	Solvent based Powerful Stain Removing agent for cotton & its blends

Swelling & Drum Aid Agents

16	Aroswell 87	Swelling & Scouring Agent for polyester & its blends. It fills up the gap of rotto fiber resulting in uniform & deep dyeing. It provides bulkiness to the fabrics.
17	Synox XD	A Scouring agent also used as a swelling agent

Mercerizing Agent		
Sr. No.	Product Name	Description
18	Aromerce NC Conc.	Concentrated, Anionic, non-cresylic, mercerising agent for cellulosic fibers

Peroxide Stabilizer		
19	Stabilizer PBE	Silicate free Organic Stabilizer for Peroxide boiling for cotton fibers

Peroxide Killer		
20	Orgasol OPG	Inorganic Peroxide Killer for cotton fabrics
21	Starcozym Kill	Enzyme based Peroxide Killer for cotton fabrics

DYEING		
Dye Fixing Agents		
22	Ecofix MGFF	Formaldehyde Free Excellent Dye Fixing agent to improve wet fastness of direct and reactive dyes
23	Starcofix HCF Conc.	Concentrated Non Formaldehyde based Dye Fixing agent for improving the wet fastness of reactive dyes

Levelling Agent		
24	Starcodye TFT	Levelling Agent for Dyeing of Disperse Dyes for Polyester & its blends
25	Starcodye E3G	Levelling Agent for Dyeing of Reactive Dyes for Cotton & its blends

Silicate Removing Agent

Sr. No.	Product Name	Description
26	Softex SRC	Silicate Removing agent for dyeing reactive dyes on Cotton & its blends by padding method

Washing Off Agents

27	Reactopan TTC	Crypto Anionic Detergent, Scouring, Wetting and Washing off agent for reactive prints
28	Starcopur PC	Washing off agent for Cotton fibers

PRINTING

Binders

29	Starcobind 4000	Printing Binder to produce prints with higher ratings for dry & wet rubbing fastness and soft print on hosiery like soft fabrics
30	Starcobind TLN	Printing Binder with excellent all round application properties

Levelling Agents

31	Printwell SP	Levelling, Lubricating & Anti-Chocking / Frothing / Sprinkling Agent for printing reactive and pigment dyestuffs
----	--------------	------------------------------------------------------------------------------------------------------------------

FINISHING

Cationic Softeners

32	Arosoft CSG Flakes	Concentrated Hot Water soluble Cationic Softener in flakes form that imparts superior surface smoothness with bulk hand
33	Softener NCS Flakes	Concentrated Cold Water Soluble Cationic Softener in flakes form that imparts superior surface smoothness.
34	Aromine BCS Flakes	Concentrated Warm Water soluble Cationic Softener in flakes form that imparts surface smoothness to the fabric

Reactive Softener

Sr. No.	Product Name	Description
35	Reactosoft RIS Conc.	Reactive softener that gives a soft permanent finish to the fabric and does not cause yellowing

Ester Quat Softener

36	Starcosoft FC Conc.	Concentrated Quat Softener that does not give Yellowing to the fabric and exhibiting good softness & handle along with good dispersion property.
----	---------------------	--------------------------------------------------------------------------------------------------------------------------------------------------

Non Ionic Softener

37	Softener NIS Flakes	Hot Water Soluble Non Ionic Softener in Flakes form that gives smooth finish with body to the fabric
38	Starcosoft NIS Conc.	Hot Water Soluble Non Ionic Softener in Paste form that gives smooth finish with body to the fabric

Silicon Softener

39	Ecosil 701	Concentrated Amino Silicon softener for soft finish with surface smoothness
40	Starcosil MW	Ready to Use Micro Amino Silicon Softener that gives a soft finish with surface smoothness
41	Starcosil BLK 1000	Block Silicon based Ready to Use softener that imparts higher Inner Softness and low surface smoothness. Best for Rayon Fabric of all qualities.
42	Starcosil HLK 2009	Ready to use block silicon based softener that imparts higher surface smoothness and low inner softness.

Elastomeric Silicon Softener

43	Estarco Luxor Conc.	Concentrated modified silicon elastomer for luxurious soft and bouncy feel. It imparts inner softness to the fabric
----	---------------------	---------------------------------------------------------------------------------------------------------------------

44	Urolust 3200	Ready to use modified silicon elastomer for luxurious soft and bouncy feel. It imparts inner softness to the fabric
----	--------------	---------------------------------------------------------------------------------------------------------------------

Polyethylene Wax Emulsion

Sr. No.	Product Name	Description
45	Arolust PEX Conc.	Hot Water Soluble Polyethylene Wax softener in Cubes form that gives a soft finish with luster and shine to the fabric with slight body.
46	Arolust PEX 1010	Ready to Use Polyethylene Wax softener in viscous liquid form that gives a soft finish with luster and shine to the fabric with slight body.

Blooming Agent

47	Starcobloom AG 2009	Ready to Use Blooming Agent that provides increased depth in color and appearance of the fabric.
----	---------------------	--------------------------------------------------------------------------------------------------

Optical Brightening Agent

48	Starcobright 2B	Optical Brightening Agent in Powder
49	Starcobright 2SI Liq.	Optical Brightening Agent in Liquid form
50	Starcobright White R	Optical Brightening Agent for Polyester
51	Starcobright DNM	Optical Brightening Agent for Denim

Anti Static Finish

52	Starcodye AS 1020	Provides Anti Static Finish to the fabric along with maintaining hydrophilicity. Is a good levelling agent for polyester / acrylic when used as a pre-exhaust
----	-------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------

Bulkiness Finish for Garments

Sr. No.	Product Name	Description
53	Starcosize AS 5000	Imparts body, yarn gap filling and stiffness with softness to the fabrics and especially garments that gives a bulkiness and fuller feel to the fabric.

Yarn Sizing Chemicals

54	Starcopol PR	Granules form that Imparts stiffness and strength to the yarn or fabric of polyester or cotton. Excellent for tackling hairiness of the yarn.
55	Starcopol AR	Powder Form Acrylic Resin used in Sizing of Yarn
56	Starcosize SSFC	Starcosiz SSFC is a Single Shot Sizing Agent formulated for Finer Count Cotton Yarns of 30 to 80 count to be woven on high speed weaving machines.
57	Starcosize SSCC	Starcosiz SSCC is a Single Shot Sizing Agent formulated for Coarser Count Cotton Yarns of 10 to 20 count to be woven on high speed weaving machines.
58	Starcosize SSDM	Starcosiz SSDM is a Single Shot Sizing Agent formulated Denim Yarns. The product contains all necessary sizing components for a complete and balanced sizing formula.
59	Starcosize SSTT	Starcosiz SSTT is a Single Shot Sizing Agent specially formulated for Terry Towel Yarns for high speed weaving machines. It is easy in desizing.

Anti Microbial Finish

60	Starco AM 1060	Imparts retentive anti-microbial and anti odor protection to garments, home textiles, technical applications
----	----------------	--------------------------------------------------------------------------------------------------------------

Printing

61	Fixer CCL	Fixer used for fixing printed fabrics
----	-----------	---------------------------------------

62	Starcobind PDN	Pigment binder specially for pigment printing
63	Starcoprint TK	Pigment Thickener for improving rheology of the printing paste
64	Starcoprint RPT	Reactive Printing Thickener that gives a smooth paste improves brilliancy as compared to other natural thickeners.

Soaping Agent

65	Starcodye AT 2009	Premium Quality Soap for Reactive Dyeing and Printing with Anti-Redeposition properties and imparts excellent Wetting to the fabric.
----	-------------------	--------------------------------------------------------------------------------------------------------------------------------------

Defoaming Agent

Sr. No.	Product Name	Description
66	Starcodefoam DW 2009	Ready to Use highly effective Silicon based Defoaming agent that is Temperature stable as well as high pH Stable.
